

## **ACM ALERT! Safety Program**

ALERT! is fun and engaging. It is a program designed to encourage personal involvement in an existing safety program.

ALERT! is a person-centered safety system with teamwork at its core. ALERT! differs from other safety programs: it focuses on the individual, stresses their motivation for working safe, builds their skill at identifying hazards, estimating risks, and provides them with tools to work in teams to reduce or eliminate unacceptable risk.

ALERT! Builds people by showing them respect, recognizing their skills, knowledge and contribution as well as teaching them new skills.

ALERT! is focused on “what’s possible”

### ***Outcomes of Course:***

- Participants will be able to use positive communication across company boundaries
- Participants will have confidence that they will go home injury free
- Participants will be able to apply new safety techniques that build on their existing knowledge and skill
- Participants will engage differently in workplace safety
- Participants will create a platform for true teamwork creating an injury free workplace
